About us: "MAP Family Learning Center" in Malden, MA is an after school programming for students to supplement their education with high-quality Music, Art, and Programming (MAP) classes. Our mission is to provide high-quality, integrative, project-based learning services.

Review from a parent:

Both my kids enjoyed learning guitar under (MAP Instructor) Devin. He has a way about him that draws children in and engages them. He encourages each child — never putting anyone down or making any child feel as if they aren't good enough. He sees each child at their level and even in a group individualizes the work each child needs to blossom. I really like how he makes sure that all the kids are capable and helping them excel.

Highly recommend Devin and his classes.
